HOW TO PAIR

1) Open **Tuya Smart** or **Smart Life app** on smart device.

2) Using a pin, press and hold the reset button for 15 seconds until the green Network.
   Connection Indicator lights up, and blink continuously. This would indicate that the
   device has been reset and is in pairing mode.

3) Within the app, click "+" icon at the top right corner and click "Add Device".
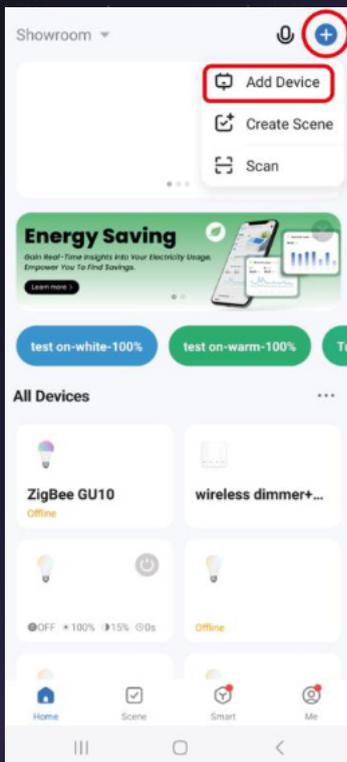

4) You will enter the page below, then select the gateway option, and the app will scan and detect any pairing bulbs.
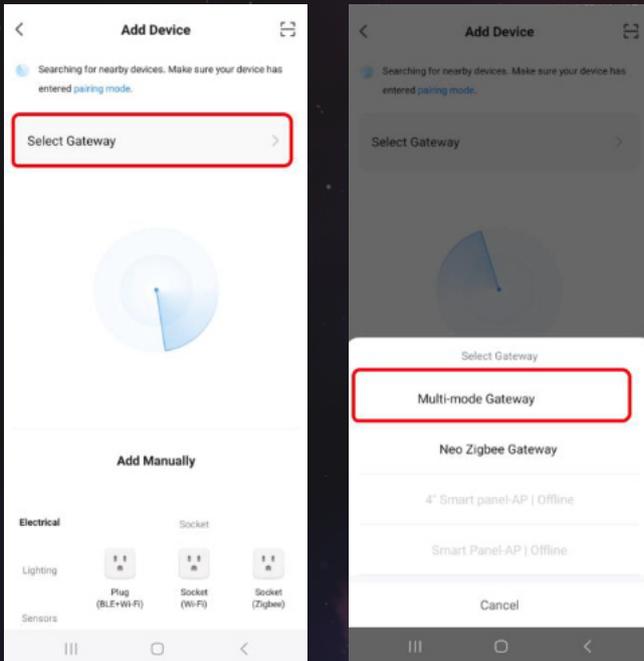

5) The bulb in pairing mode will appear on the screen. Select it and the bulb will be paired with the app.
